

# New User Experience (UX) Success Accelerator

How can I accelerate my organization into Anaplan's UX?

Anaplan offers a "Success Accelerator" services package that combines both UX instructor-led training, as well as dedicated Solution Architect time to be used to support UX planning and/or build activities.

**All planning for all people - anywhere.**

The UX training fully immerses participants in the UX. Your Anaplan Model Builders and Solution Architects can soon become expert page builders. The training covers the new U.S.E.R. methodology, which supports best practice in page building and design for a successful UX implementation.

## What will I learn?

- Overview of the UX
- Different components of the UX
  - Board vs. Worksheet
  - Mobile
  - My Pages
- Best practices for the UX while using Anaplan
- Hands-on practice reproducing Classic dashboards into the UX with two training models
- Introduction to the U.S.E.R. methodology for UX implementations
  - Understand – Sketch – Execute - Repeat

## What will I do?

Participants will take an agile, sprint-based approach, similar to a "hackathon", to:

- Build working pages in the UX for your context
- Maintain and update your apps
- Leverage the U.S.E.R. methodology

### Plan and Build with Solution Architect

- Review existing use cases, user roles (personas), and user journeys
- Identify specific user roles or use cases to transition to the UX
- Wireframe the user experience
- Focus on specific user journeys to build an app
- Discuss change management and training for rolling out the UX to end users
- Provide feedback on your experience
- Create a transition plan for remaining use cases and user roles

Connect with your Business Partner today to take advantage of this great opportunity and identify if this Success Accelerator would be beneficial for your organization.
